TUFLEX

A change for better

TUFLEX Polymer Nets – Revolutionizing the Poultry Industry.

TUFLEX INDIA is one of the pioneer leaders in the field of extruded polymer nets. TUFLEX INDIA now brings to you the technology that has revolutionized the Poultry Industry. Progressive poultry farmers throughout Europe and America have been using extruded polymer nets for maintaining better hygienic and productivity standards.

TUFLEX Extruded Polymer Net is a truly futuristic material that gives you tomorrow's benefits today.

Advantages of TUFLEX Nets for Cage/Slated floors

- Versatile and superior than GI Wire Meshes and Wood
- Does not get corroded or rusted. TUFLEX Nets have a very long life as compared to any other option
- Being a non-conductor of heat, it keeps birds safe from toe and breast blisters
- TUFLEX Nets are light in weight and with superior strength
- They are easier and more convenient to install than wire mesh
- As the product has no sharp edges, it will not hurt the birds
- It is easy to clean or disinfect as compared to wire mesh. There is no rusting or corrosion
- TUFLEX Net offers a comfortable and more natural habitat to birds, allowing higher bird density
- Unlike wood, it does not have inherent problems such as termite and ticks

Rakshak Agro Shading Fabrics for Poultry Shading

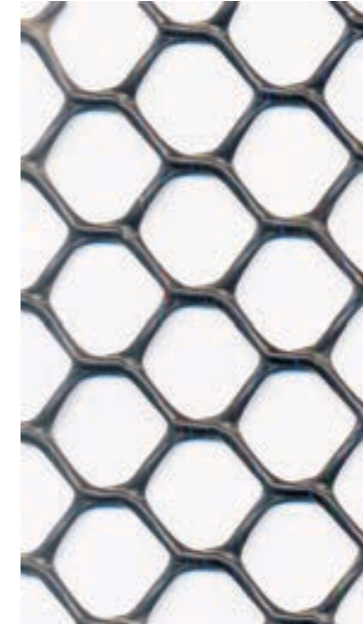

As a part of summer management, where the soaring temperature affects birds to a large extent, Rakshak Agro Shading of shade factor 75% has been used to reduce temperature inside the poultry sheds by 3-4 degrees. The usage of Rakshak gives unique advantage to the poultry farms, giving comfort to the birds from high temperature, and thereby increasing the productivity of birds.

The product is available in the following widths:

3 M x 50 M & 5.3 M x 25 M

TUFLEX - LCFM

(Layer Cage Floor Mesh)

Layer Cage Floor Mesh (LCFM) helps to reduce egg breakage in cages

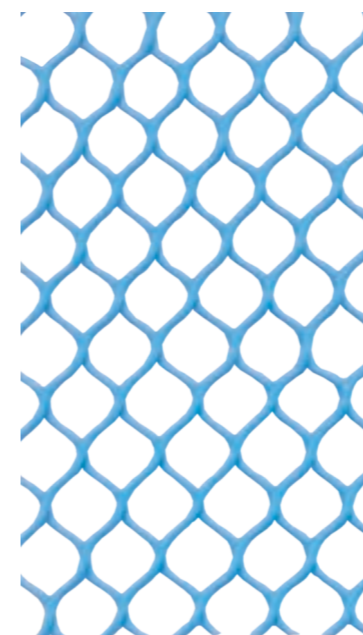

TUFLEX LCFM is laid as a carpet inside layer cages on the GI floor and bound in corners with binding wire. It is also used to cover the egg-gutter area.

Advantages of TUFLEX LAYER CAGE FLOOR MESH (LCFM)

- Its soft surface reduces egg breakage by providing cushioning to the eggs and protects egg shell from damages
- Reduces the problem of hairline cracks in egg shell, especially among the broiler parents reared in cages
- In tropical climates LCFM acts as insulator between the hot weld mesh and the bird's toes and facilitates better egg laying during summer
- Reduces egg laying inhibition and protects the birds from toe blisters
- Easy passage of litter through large mesh openings of LCFM making it ideal for GP and Parent Stock in cages
- Easy to clean, disinfect and scrub with the use of soap water. There is no rusting or corrosion
- One time investment that improves the quality of the cages and lasts long providing better value for your money

TUFLEX - BROODET

(Brooding Cage Floor Mesh)

TUFLEX Broodet to reduce chick mortality in Brooding Cages

The TUFLEX Broodet is laid as a carpet inside the brooding/grower

Features of Broodet

- Reduces chick mortality
- Protects the tender toes of the chicks from injury on the metal cage floor
- Avoids diseases like Bumble foot, gangrenous, dermatitis, etc
- Separate brooding cage is not required when Broodet is used, as it can be placed inside the grower cage, and the same cage becomes a brooding cage
- It does not conduct heat and gives protection against toe and breast blisters to the chicks

TUFLEX Cost Advantage

In case of parent rearing in cages (about 0.5 sq.ft/bird), the cost per bird is Rs.5.00. This cost can be recovered within six months depending upon the incidence of hairline cracks of eggs.

So why not switch to TUFLEX and hatch more profits?
